

# MakeICT

You've received the gift of making!

To: \_\_\_\_\_

From: \_\_\_\_\_

Date gift was given: \_\_\_\_\_

Months of Membership: \_\_\_\_\_

Welcome to Wichita's Makerspace, we are excited to meet you! As a member of MakeICT, you can receive free authorization and safety classes for our tools and resources, discounts to our classes, and after completing a key application you'll be eligible for 24x7 access to our makerspace. Our 8,000 square foot facility is home to a woodshop, metalshop, printing studio, textiles area with sewing machines and sergers, fabrication lab with 3d printers, a foam cutter and laser cutter, a jewelry studio, art gallery, coworking space, ceramics studio, and a community of members and makers ready to help you learn everything.

## Your next steps:

- 1) Visit MakeICT! We have tours and orientation every 2nd and 4th Monday of the month from 7-9PM. Bring this form with you if you're ready to activate your membership. You'll meet the leaders of the areas most important to you to learn about each area's paths to tool authorization.
- 2) Check our calendar at [makeict.org/calendar](http://makeict.org/calendar) to sign up for safety classes. The woodshop, metalshop, and laser cutter are the three biggest areas requiring authorization.
- 3) Print off a key application from [makeict.org/join](http://makeict.org/join) to start talking to us about how to apply for 24x7 access to the makerspace.
- 4) Contact us to help you! Email [info@makeict.org](mailto:info@makeict.org) with your plans and we will show you the way. We are operated 100% by volunteers who are all members just like you, willing to help you so you can get acquainted and later help others.
